

Eid Yasser Eid Hassan

Penetration Tester & Security Engineer

eid2000yasser@gmail.com | linkedin.com/in/eid-yasser | github.com/0x3id

+20 114 440 1897 | Egypt

PROFILE

Cybersecurity Graduate specialized in Web Application Penetration Testing, Bug Hunting, and Secure Backend Development. Proven experience in identifying and exploiting web vulnerabilities (OWASP Top 10) and building complex, enterprise-level SaaS security platforms. Strong background in network security, containerized architectures, and full-stack PHP/Laravel development, with a focus on offensive security research, CTFs, and automated vulnerability management.

EDUCATION

Beni-Suef National University

Bachelor of Science in Computer Science – Cybersecurity

Egypt

Oct. 2022 – Jun. 2026

PROJECTS & SECURITY SYSTEMS

CyberGuard – Multi-Tenant B2B SaaS Security Platform (GitHub) | *Laravel, Docker, WebSockets, PHP* 2026

- Engineered a multi-tenant B2B SaaS platform for automated vulnerability scanning and target management.
- Architected automated security scans executing inside isolated Docker containers with real-time log streaming using WebSockets (Laravel Reverb).
- Implemented automated domain ownership verification via DNS TXT record checks and automated PDF security report generation.

Zero-Knowledge Password Manager (GitHub) | *PHP, MySQL, Cryptography*

2025 – 2026

- Designed and implemented a secure web password manager based on Zero-Knowledge architecture.
- Integrated end-to-end client-side encryption, secure authentication mechanisms, and cryptographic password generation.

CERTIFICATES & TRAINING

Network Security Certification

Sep. 2025

NTI – National Telecommunication Institute

Certificate

- Practical training in network security assessments, reconnaissance, ethical hacking techniques, and penetration testing methodologies.

CompTIA Security+ Training

Feb. 2025

Netriads

Certificate

- Covered core cybersecurity principles, risk management, access control, cryptographic concepts, and security operations.

PHP & MySQL Web Development

Jul. 2024

ITI – Information Technology Institute

Certificate

- Developed secure web applications with focus on backend logic, secure authentication, and database defense against SQL injection.

CCNA Certification Training

Mar. 2024 – May 2024

NTI – National Telecommunication Institute

Certificate

- Hands-on network configuration covering enterprise routing, switching, VLANs, subnetting, and network troubleshooting.

TECHNICAL SKILLS

Penetration Testing & Offensive Security: Web Application Security, OWASP Top 10, Bug Hunting, Vulnerability Assessment, IDOR, SQL Injection, XSS, CSRF, Authentication Bypasses.

Security Tools: Burp Suite, Nmap, Metasploit, Nikto, Gobuster, SQLmap, Hydra, Kali Linux, Docker.

Programming & Frameworks: PHP, Laravel (10/12), Python, Bash, JavaScript, MySQL, HTML/CSS.

Networking & Operating Systems: TCP/IP, DNS, HTTP/HTTPS, Routing & Switching, Subnetting, Linux (Ubuntu/Kali), Windows / WSL2.

COMPETITIONS & AWARDS

Global Cyber Championship – Egyptian Qualifiers (CTF)

2025

Information Technology Institute (ITI) & Zinad IT

Egypt

- Participated in the national qualifiers CTF competition, solving technical challenges across web exploitation, cryptography, and network security.

Egyptian Collegiate Programming Contest (ECPC)

Jul. 2024

ECPC

Alexandria, Egypt

- Participated in national competitive programming contest, demonstrating advanced algorithmic problem-solving and teamwork.
